Magdalena's Made in Tyrol

Active Ingredients & Product Description

Magdalena's deo spray also contains a blend of **seven precious, native organic herbal extracts:**

Composition	
Yarrow Achillea Millefolium	Yarrow grows on sunny slopes,

	meadows and fields in the Alps and is a member of the Asteraceae family. It is one of the oldest medicinal plants, thanks to its soothing, antimicrobial and anti-inflammatory properties
Yellow beet <i>Daucus Carota</i>	Yellow beet belongs to the Umbelliferae family and thrives on poor, dry soils both in the mountains and in the lowlands. It possesses a number of medically effective ingredients - such as carotenoids
Genuine arnica <i>Arnica Montana</i>	The aromatic scented real arnica thrives in the mountains of Europe and belongs to the family of composite plants. It is a long-established medicinal plant with stimulating and antimicrobial effects and is therefore used, amongst others, for wound healing and limb pain.
Yellow melilot <i>Melilotus Officinalis</i>	The genuine melilot is a pasture plant that belongs to the Papilionaceae family, preferring to grow on sunny and stony spots. It has a soothing effect on itching and swelling and is often used to treat arterial and venous complaints.

Active Ingredients & Product Description

Genuine meadowsweet <i>Spiraea Ulmaria</i>	The intensively sweet-scented meadowsweet belongs to the rose family and prefers moist and very nutrient-rich habitats. The medicinal plant is said to have antibacterial, calming and anti-inflammatory effects.
Genuine St. John's wort <i>Hypericum Perforatum</i>	The invigorating, protective and skin-soothing properties of St. John's wort have been appreciated since the Middle Ages. The plant's medicinal effects are very diversified and can therefore be used in a variety of ways - it is also known to be well tolerated by hypersensitive and intolerant skins.
Yellow gentian <i>Gentiana Lutea</i>	The lime-soil-loving yellow gentian is a typical mountain plant found in the Alps <i>The gentian root contains a high proportion of bitter substances that have an invigorating effect and boost the circulatory system. It also possesses pronounced antimicrobial properties.</i>
